Claims 1-6 are currently pending and under examination.

Claims 1-6 are objected to because of the following informalities: Clerical errors are noted in claims 1 and 3, i.e., the second occurrence of "the" in line 3 of the former and the phrase "any of Claim 1" in line 1 of the latter. Appropriate correction is required.

The prior art made of record and not relied upon is considered pertinent to applicants' disclosure.

Walker et al is pertinent in its disclosure of vulcanizable compositions comprising a terpolymer of isobutylene, isoprene and divinyl benzene (note Example I and Table I). The content of unreacted vinyl group from DVB in the terpolymer is not directly measured.

Darling et al is pertinent to the use of FT-IR to assay for polymerized 1-(vinylphenyl)ethylene repeat units in polymer of DVB and ethylstyrene (note col. 8, bridging paragraph).

Claims 1-6 are allowable in substance on the present record.

The following is a statement of reasons for the indication of allowable subject matter: the use of FTIR measurements to predict the content of unreacted vinyl groups from divinyl aromatic monomer in an isoolefin polymer comprising repeating units derived from at least one divinyl aromatic monomer, as per the claimed process, is not

taught nor fairly suggested in any prior art document(s) located or identified by the examiner as of the date of this Office action.

This application is in condition for allowance except for the following formal matters:

Claim informalities as detailed above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

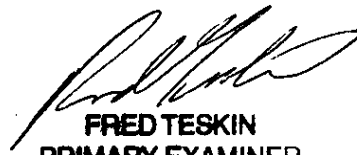

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
